

## An outrageous C.S.I style event!

The conference is hilariously interrupted by a team of Detectives who noisily seal off the room and then declare the entire area a crime scene. Our murder victim was Carlotta Druscilla, a well-known local Diva and cabaret entertainer who frequented many of the bars and nightclubs in the local area, but also made plenty of enemies along the way.

Carlotta's body has been found in a hotel room and Police are in no doubt that they are now dealing with a Murder. Police have managed to paint a pretty detailed picture of Carlotta's last hours placing her with several characters that now form a short-list of suspects. The investigation has ground to a halt and Police need the assistance of your team to recreate the last hours of Carlotta and produce a rich tapestry of evidence that will hopefully enable the arrest of the murderer before more Divas fall victim to this nasty horrid person. Teams will need to use a wide variety of skills to produce an accurate account of the events preceding this tragic event. These skills will include analytical ability, information-gathering techniques, problem solving and the efficient use of the wide range of resources available to them. Delegates are issued with a pack containing costumes, cameras and a variety of useful tools for their investigation. They may also acquire information from interviews of the main suspects and undertake real forensic CSI techniques (ballistics, serology, chromatography etc).

**Duration:** 3 – 4 hours

**Key Themes:** Team approaches to problem solving and investigation, team roles and diversity, fun and breaking down barriers, cross-functional communication, creativity and innovation.

**Group Size:** 10 and up.

**Venues:** Highly versatile. Works best indoors but can easily incorporate forays into diverse outdoor locations at virtually any meeting venue.
