

TAILORED TEAM AND MANAGEMENT DEVELOPMENT

Pre-programme diagnostics

Prior to the programme each participant completes a full Individual Self Perception Inventory and also has four Independent Observer Assessments completed to create a detailed Team Role profile for each person. These are then analysed to produce detailed profiles of the individuals operating styles and the collective operating style of the team itself.

2 hour, Half-Day, Full-Day and Multi-Day Options

Each programme is designed to suit the unique needs of each client and will include - Introduction to the Team Role Model and detailed explanation of individual and team profiles. Formation of deliberately balanced and un-balanced teams for carefully selected experiential challenges that are reviewed in detail. Major project based challenges designed to enhance learning and application of the model followed by reviews linked to the workplace. Team sessions to capture key lessons learned and how to roll out those lessons learned to the workplace.

Post programme review and follow through

Facilitated or self-driven strategies are devised so that participants revisit the programme experience at pre-determined "milestones" within their work environment to help the learning stick.

Duration: 2 hour, Half Day, Full Day or Multi Day

Key Themes: Targeted team, leadership and management development tailored for genuine team and business needs.

Group Size: 3 and up.

Venues: Can be deployed at virtually any meeting venue with indoor and / or outdoor inclusions as required.
