

STRATEGY, FUN, BUSINESS MESSAGES, BUILD AN EMPIRE

Recruited by some noisy Romans, who also deliver a lively introduction on the glories of Rome, your team is quickly thrust into an exciting hands-on business game. Fight battles, trade exotic goods, negotiate at the forum, be entertained at the arena and build the most profitable empire by making the best use of available resources. This unique teambuilding journey into the glory and the business of Rome is tailored to suit your needs whether pure conference fun and adventure, or for carefully designed business learning outcomes. Teams undertake fun hands on challenges that include the risky conquest of new territory, consolidation of those gains, customer satisfaction (for the people and senate of Rome) and the progressive enhancement of their empire. Vigorous trading and commerce will follow along with technical, social and economic developments necessary to maintain the empire. Team members will be responsible for highly interdependent functions that must be carefully co-ordinated to ensure that the common goal of the team is reached.
